Importing a pack

Download and install the Soundbox Engine from the audiomodern website:

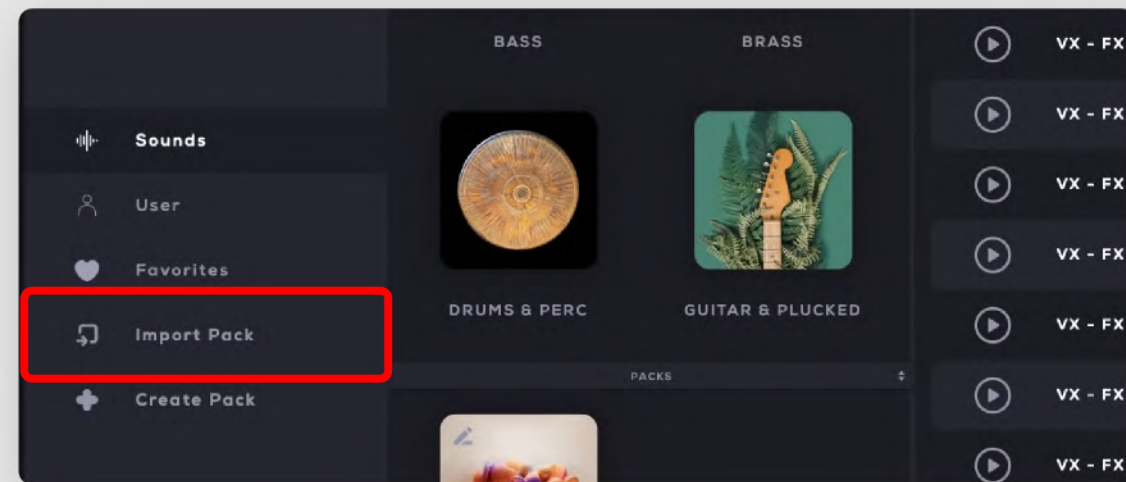

<http://audiomodern.com/soundbox>

Soundbox packs can be imported into Soundbox by simply dragging & dropping them (.sbpack) into Soundbox.

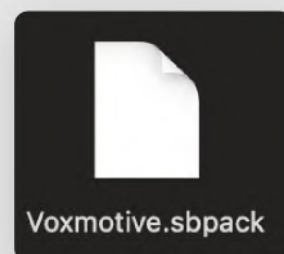

Alternatively, click the **User Sounds** menu to enter the presets & packs manager.

Click **Import Pack**.

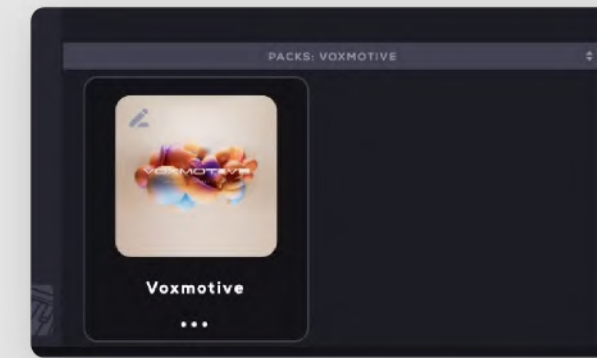

Locate and select the Soundbox Pack (.sbpack) that you want to import and click Open/Import:

Done!

Now you are able to see the Imported Pack under the Packs category.

All presets included in the pack can be found in the right column. Double-click a preset to load it.
